

MICCA – Mosan Initiative for Climate Change Action

ADAPTING THE INTERNATIONAL MEUSE CATCHMENT TO CLIMATE CHANGE IMPACTS

Promoted by EPAMA since the end of 2019, MICCA's goal is about defining and implementing measures and actions for preparing the international Meuse watershed to the impacts of climate change but also to mitigate these impacts.

We believe that to achieve this goal, we collectively need to :

-  Share our Mosan water resources
-  Reach towards zero-pollution in our waters
-  Give more space to nature
-  Build a transparent community of Mosan dwellers
-  Achieve a more resilient Mosan basin

Your organization is active on the Meuse river basin and we would like to discuss further with you about MICCA and how you could be part of the initiative.

Come share your thoughts on the date of your choice :

Link to register and participate to the conference :

Monday, February 21 st , 2022	09.30-12.00	https://zoom.us/j/96556591694
Tuesday, February 22 nd , 2022	14.00-16.30	https://zoom.us/j/93018750555
Wednesday, February 23 rd , 2022	14.00-16.30	https://zoom.us/j/94465926155

Meetings are in English but we promise there will be many visuals and you can contribute by writing in your own language if this is easier for you.

Program includes :

- ◆ A presentation of MICCA and activities so far
- ◆ An open market of solutions to adapt to climate change
- ◆ A discussion on possible forms of international organization and governance to take action
- ◆ Your opinions on how you would like to be involved to tackle climate change adaptation on the Meuse river basin
